

## Football Squares Fundraiser Instructions

## PAMANA Football Frenzy Fundraiser - Sept. 15, 2019

- We will have a grid of 100 squares. Please see other link on our website.
- Each square costs \$20.00 each. You can buy one or more squares. The more squares you buy, the more chances you have of winning.
- Once all squares are sold, numbers 0 - 9 will be placed randomly on the top row (Packers) and also on the left side column (Vikings). These numbers represent the last digit of the score, at the end of each quarter and game.
- A video will be made on when the numbers are randomly placed.

### How to enter the game

- Choose a square (or multiple squares 1- 100) that you would like.
- Contact PAMANA President Lynelle Harrison at **(text only) 608-692-0218** or email at **Lynelle3pamana@gmail.com** and provide the following information:
  - Your first and last name, your cell phone #, your email, and Square(s) #.
  - This information is kept confidential for the purpose of this fundraiser only.
- Lynelle will confirm if the squares you chose are still available.
- Payment must be made by check or cash (must be received within a week) or pay by credit card on PAMANA's website. [www.pamanamadison.org](http://www.pamanamadison.org)

### How do you win?

- A winner will be determined at the end of the 1st quarter, 2nd quarter, 3rd quarter and the final game score. The winner is determined by looking at the last digit in each teams' score, and then matching those numbers on the grid and seeing which square intersects those two numbers.
- An **example** would be if the AFC versus the NFC were in the Super Bowl, and the score at the end of the game was AFC 23 and NFC 14. The last digit for the AFC is 3 and the last digit for the NFC is 4. The square on the grid that has the AFC with a number 3 and the NFC number of 4, would be the winner (3, 4).

### Prizes

- Prize for the correct digits at the end of the First quarter is \$200.
- Prize for the correct digits at the end of the Second quarter is \$200.
- Prize for the correct digits at the end of the Third quarter is \$200.
- Prize for the correct digits for the Final Score is \$400.
  
- You can win more than one quarter.
  - **For example**, if the score is the same for the first and second quarter and you own those digits, you would win both quarters.
- You can win up to \$1000.
- You do not need to be present to win.
